

Guidance for Laxton and Moorhouse residents responding to GNR solar park consultation

Government recommended contents of a Local Impact Report for local authorities in relation to nationally significant infrastructure projects include the following (see <https://www.gov.uk/guidance/nationally-significant-infrastructure-projects-advice-for-local-authorities#impact>).

Taking account of the topics listed below when considering the impact in Laxton and in Moorhouse specifically should help residents to respond in ways relevant to the planning system and which clearly show:

1. The impact on the community and on the landscape which they know best
2. How that impact might be mitigated for the community and on the landscape which they know best.

If you would like your views to be taken into account in the parish council's response, email laxtonparishclerk@gmail.com

Topics:	Comment:
A description of the location of the site and the surroundings. Details of the project.	This can be brief and cross refer to the applicant's description of the project where relevant
Details of the characteristics of the local area, such as urban and landscape qualities and nature conservation sites	This should include any designated sites. There is no need for the LIR to replicate the EIA
Any constraints relevant to the site and area	
Local transport patterns and issues	
Any local evidence of flooding	
Locations of, and impacts on, sensitive receptors	This should include an explanation of how those impacts have been considered
Details of the impact of the project on the local area, including social, environmental, transport / highways, heritage and economic matters and their relative importance	This should include any impacts relating to employment and local services
Any relevant planning history and issues arising, including any relevant development proposals under consideration or granted permission, but not commenced or completed	This should include details of any likely cumulative effects
